

SFB POLYGENIC ADAPTATION:

From single selected loci to the infinitesimal model

Postdoc and PhD positions available!

Postdoc positions with [Joachim Hermisson](#) and [Himani Sachdeva](#) (Univ. of Vienna, AT)

- Evolutionary modeling

Apply by
Sept. 17, 2023

PhD positions with [Neda Barghi](#) and [Christian Schlötterer](#) (Vetmeduni, Vienna, AT):

- Characterizing the adaptive architecture of polygenic traits
- Characterizing the role of non-additive effects for adaptive responses
- Comparison of the genetic and adaptive architectures of polygenic traits
- Genomic and phenotypic patterns of adaptation in large experimentally evolved populations
- The extent of genetic redundancy in polygenic adaptation
- The role of genotype x environment interactions for adaptive responses
- Understanding polygenic adaptation with reduced genetic variation
